# DIGITAL RESTORATIVE PROGRAM

*SINGLE UNIT TO FULL ARCH DIGITAL WORKFLOW*

## **COURSE DESCRIPTION:**

This program will focus on digital technologies used in the fabrication of CAD/CAM and Ti-Base abutments as well as implant-supported restorations with the BellaTek® Encode System. Detailed specifics and benefits of this system will be explained in terms of comfort and efficiencies for patients, staff members, and dental laboratory technicians. There will be case presentations with an in-depth review of a full-arch digital case restoration completed from an Encode Emergence scan. The program will conclude with an introduction to the RealGuide software suite used for digital case planning and surgical guide planning and creation. This course is designed for the entire dental team.

**At the completion of this program, participants should be able to:**

- Understand a simplified impression protocol for fabrication of implant-supported restorations with an intraoral scanner or traditional impression procedures.
- Comprehend several new digital technologies available for fabricating patient specific implant-supported restorations.
- Understand CAD/CAM abutment design using the BellaTek Encode Impression System.
- Introduction to the RealGuide Software Suite which will allow you to case plan, create guides and share with members of the multidisciplinary team.
- Learn how to incorporate new digital workflows into everyday clinical practice.
