

CLASSIFICATION OF PERIODONTAL DISEASES AND CONDITIONS: THE OLD, THE NEW AND WHAT TO DO

MAY 12, 2021
2 HOUR CE COURSE

In the last two decades, significant changes in the understanding of the pathophysiology and disease management in the field of Periodontics have taken place. To reflect these changes, the American Academy of Periodontology (AAP) and the European Federation of Periodontology (EFP) have developed a new classification scheme for periodontal and peri-implant disease and conditions.

To introduce the New Classification system, Advanced Periodontics and Implantology's, Dr. Leyvee Cabanilla-Jacobs will present an interactive course which will evaluate the difference(s) between the Old and New Classification system and how influential its impact is on diagnosing and treating our patients.
