

Root Resorption: The Process, Planning and Prognosis

Presented by:
**Susan B. Paurazas,
DDS, MS, MHSA**

2 HOUR CE

LEARNING OBJECTIVES:

- Become familiar with the process of root resorption and how it impacts treatment planning
- Learn about the use of CBCT imaging in the diagnosis of resorption
- Become familiar with treatment approaches in managing root resorption in endodontic cases

ABOUT

Dr. Paurazas is a Clinical Professor and Program Director of Graduate Endodontics. Additional responsibilities include advising of graduate student research and graduate Endodontic admissions. Her interests focus on evidenced-based endodontics, and regenerative endodontics. Dr. Paurazas holds a Masters degree Endodontics and a D.D.S. degree from the University of Detroit Mercy and a Masters degrees in Health Services Administration from the University of Michigan School of Public Health. She is a Board Certified endodontist. Dr. Paurazas is a speaker at local, regional and national continuing education courses. Dr. Paurazas has served on multiple committees of the American Association of Endodontists, including the Research and Scientific Affairs committee and the Educational Affairs Committee. Dr. Paurazas is actively involved in the American Dental Education Association and serves on the Council of Advanced Education Programs, and is past president of the ADEA Section on Endodontics. Dr. Paurazas maintains private practice in New Baltimore, Michigan.
