

Pain Management in The Dental Patient

Presented by:
Dr. Sanjay Chand, MD

3 HOUR CE

COURSE DESCRIPTION:

Adequate pain control is a fundamental right of every dental patient and dental healthcare professionals need to understand the complexities of pain and pain medications. Effective pain management is an integral and important aspect of quality dental care. This course will discuss recommendations for effective pain management and highlight best practice guidelines for pain management in the dental patient.

COURSE OBJECTIVES:

- Discuss best practice guidelines for pain management in the dental patient
- Develop an awareness of misconceptions and consequences of untreated pain
- Recognize different types of pain and identify appropriate analgesics for each type
- Discuss the pharmacology of analgesic medications
- Describe opioids for pain management
- Discuss CDC and ADA guidelines for opioid use in the dental patient

ABOUT:

Dr. Sanjay Chand MD has specialized in Medicine with emphasis on Infection Control. He is Clinical Associate Professor at the University of Detroit Mercy's School of Dentistry. Dr. Chand is Director of Infection Control and oversees best practices at the Dental School. He is responsible for infection control policies and their implementation in accordance with CDC guidelines. Dr. Chand is a popular speaker at many Continuing Education talks at national and international conferences. His area of expertise includes Infection Control and Chronic Disease Management in the dental patient. He has been well received at the Michigan Dental Association (MDA), Michigan Dental Hygienists Association (MDHA) and OSAP (Organization for Safety, Asepsis and Prevention) Annual conference where is key note speaker this year.
